

# CREATE IBM WASTON IOT PLATFORM AND DEVICE

Date	16 November 2022
Team Id	PNT2022TMID25311
Project Title	Smart waste management system for metropolitan cities

The screenshot displays the IBM Cloud console interface for the 'Internet of Things Platform-v1' service. The top navigation bar includes the IBM Cloud logo, a search bar, and links to 'Catalog', 'Manage', and 'Kamali S's Account'. The main content area features a 'Resource list' with the entry 'Internet of Things Platform-v1' marked as 'Active'. A sidebar on the left under the 'Manage' tab lists 'Plan' and 'Connections'. The central panel contains a graphic of a central node connected to various devices, followed by the heading 'Let's get started with IBM Watson IoT Platform' and a subtext: 'Securely connect, control, and manage devices. Quickly build IoT applications that analyze data from the physical world.' Below this are 'Launch' and 'Docs' buttons. At the bottom, a 'Ready for the next level?' section shows the 'IBM Watson IoT Platform Journey' with three stages: 'Lite' (completed), 'Non-Production' (in progress), and 'Production' (pending), with an 'Activate Windows' watermark on the right.
