Project Name	Smart Waste Management System for Metropolitan cities
Maximum marks	2 Marks

Problem statement	I am	I am trying to	But	Because	Which make me feels
The problem of garbage management and maintenance in urban cities.	Resident/municipality officer	To avoid and dispose overflow garbage bins and maintain the city clean.	The overflow bins are not collected properly at regular manner.	Improper management and unawareness of the of the overflowing bins	To develop a smart waste collection system to segregate and dispose the waste, recycle it and use it efficiently and to make the areas into “smart cities”.
